Project

61-67 Oxford Street
W1
 London

Project Brief

In consultation with Essex Services Group PLC, Thermotec were asked to provide a complete design and installation scheme, in compliance with the latest environmental and technological heating systems.

Scope of Works

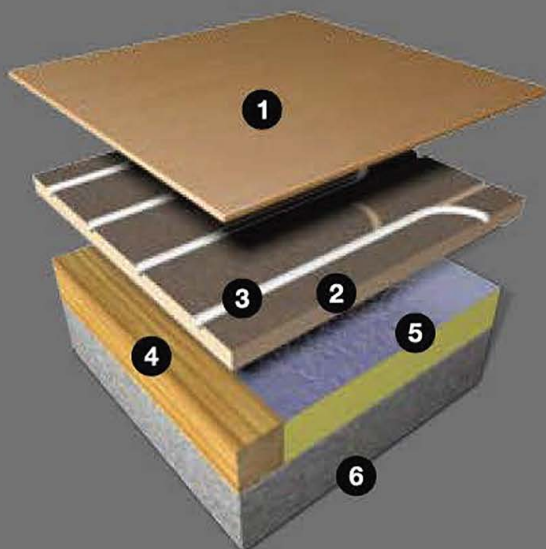

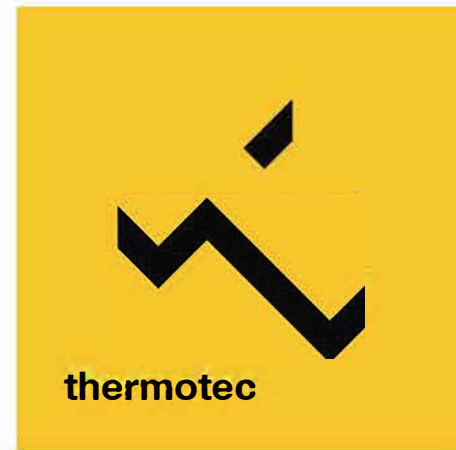

Thermotec carried out the design, supply and installation of TPA20 Aquafloor pre-grooved chipboard throughout the apartments. Module towel rails were also supplied for this project. The project was managed, installed and supervised by Thermotec, and was delivered on time and within budget.

Project Details

The Wates Group were part of a group of companies that transformed 61-67 Oxford Street. The aim was to harmonise the disparate architectural styles that currently characterise east Oxford Street by carefully replacing some local buildings of note with a prominent corner beacon. With one of its main features being its focus on glass.

2,000 m²

Aquafloor Installation

- 1 Timber floor finish or min 6mm ply for alternative floor finish
- 2 22mm Pre-grooved chipboard
- 3 Aquafloor heating pipe
- 4 Floor joist
- 5 Insulation
- 6 Timber or solid sub-floor

Unsurpassed in logistics and project planning. Assured quality installations for the mechanical and electric sector.
