Project

The Tower
 1 St George Wharf
 Vauxhall
 London

Project Brief

In consultation with Briggs & Forrester, Thermotec were asked to provide a complete design and installation scheme, in compliance with the latest environmental and technological heating systems.

Scope of Works

Thermotec carried out the design, supply & installation of Intafloor electric UFH and levelling screed in all bathroom ensuite areas and heated wall mats.

Project Value: C.I.R.O £100k

Project Details

At 181 metres tall with 50 storeys, The Tower is a residential skyscraper. It is the tallest residential building in the UK. The building is divided into three distinct parts with a base that houses a lobby, business lounge, gym and spa; a middle section containing most of the apartments and an upper section where the façade reduces in diameter to provide 360° terraces.

In August 2014, the Tower was nominated and made the Building Design short-list for that year's Carbuncle Cup.

2,016 m²

<h1>Assured Quote Warranty</h1>	A circular logo with a black background, a white checkmark, and the text '100 DAY ASSURANCE' in white below it.

Our knowledge and experience in the mechanical & electrical sector allows us to accurately research and analyse every aspect of the project detail. Through rigorous checking and double checking of our client brief, we assure our written quotations for an 100 days, unprecedented in our industry. Giving you an assurance that our quote, is our final quote, without extras.

Standard terms apply Although the warranty quoted above includes construction services because of the broad definition of the term "Work," construction contracts often contain explicit warranties of the adequacy of construction services. An example of such a warranty is the following: "Contractor warrants to Owner that construction and related services provided hereunder shall be performed in a good and workmanlike manner, by workers who are appropriately trained and experienced in the work being performed, and in accordance with all requirements of the contract documents, industry standards for projects of similar type and quality, and all applicable laws, codes, regulations and other requirements, including safety requirements."
