Project

South Hampstead High School

1-3 Maresfield Gardens
Hampstead

Project Brief

In consultation with Essex Services Group PLC, Thermotec were asked to provide a complete design and installation scheme, in compliance with the latest environmental and technological heating systems.

Scope of Works

Thermotec delivered a fully integrated floor build up system from the sub-floor base to the final floor screed using our TPA11 Aquafloor Cliprail System and standard controls. The project was managed, installed and supervised by Thermotec, and was delivered on time and within budget.

Project Value: £20M

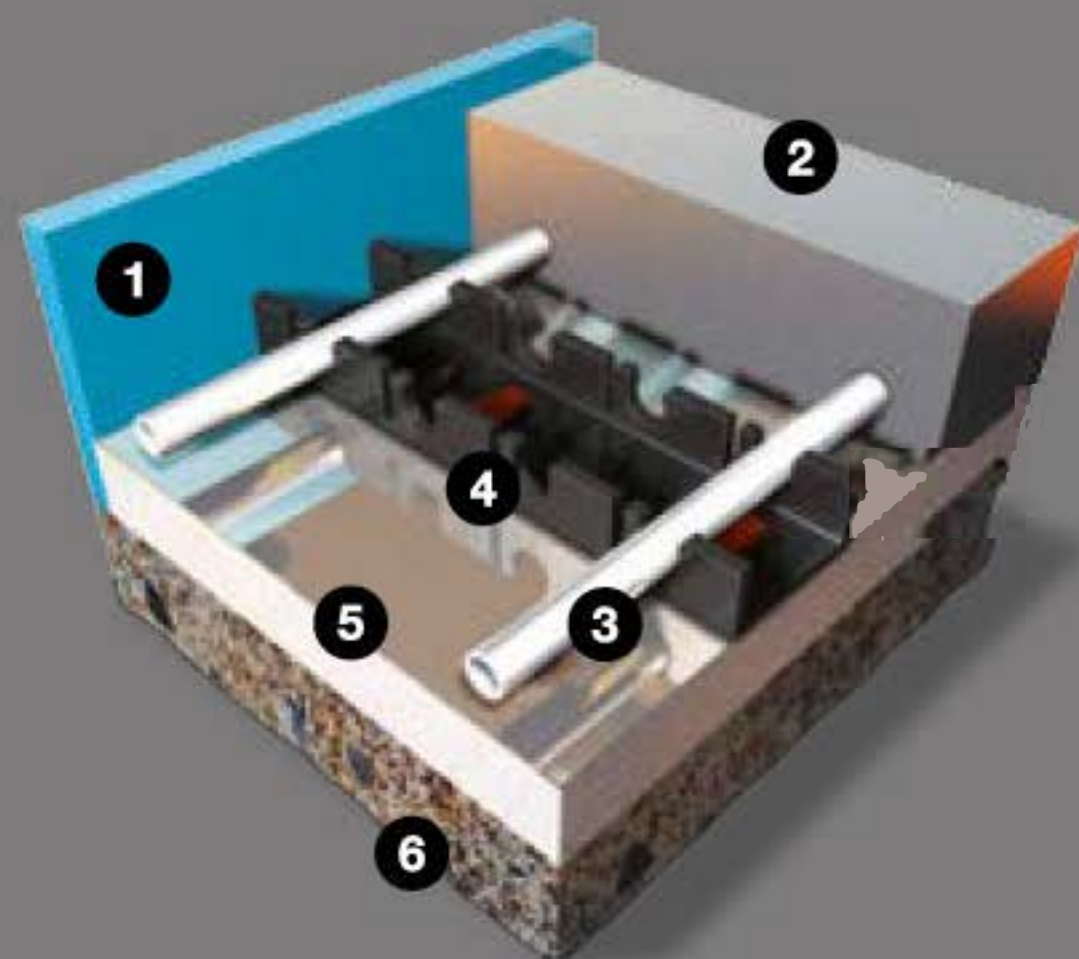

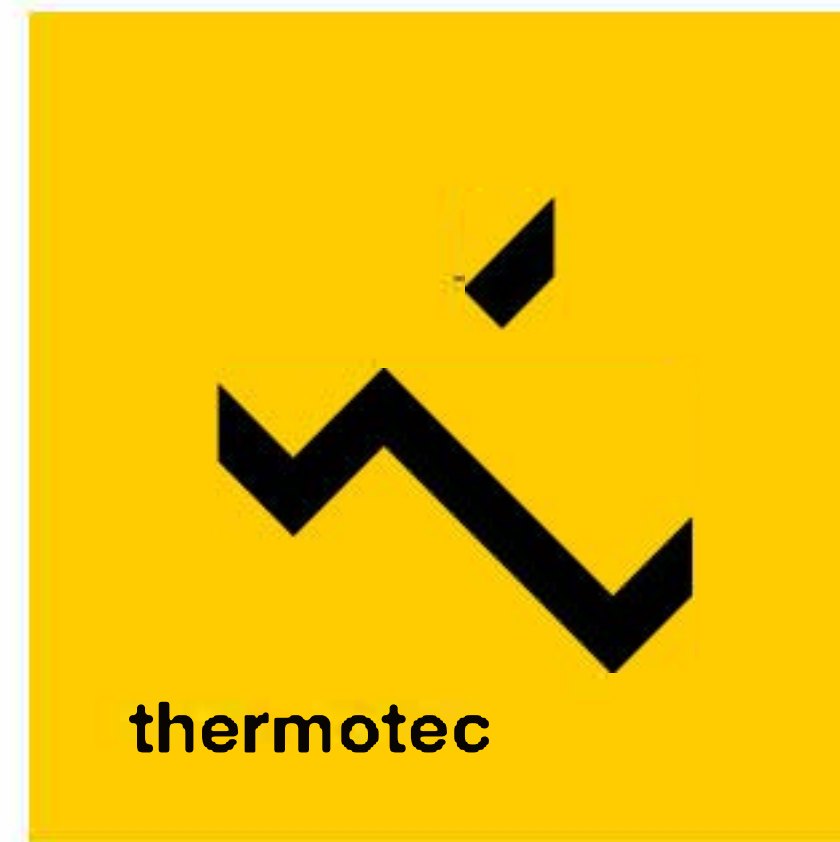

Project Details

Wates Constructon recently completed the design and build of the new South Hampstead High School in London, built to accommodate 720 students aged 11 to 18 years. The result is a modern school building that blends original features with new-build extensions.

It involved the total demolition of existing squash courts to make way for the new-build school. In addition, 2,500m² of temporary school accommodation was installed at the project outset, providing staff and students with a disruption-free environment.

1,200 m²

Aquafloor Installation

- 1 Expansion edging strip
- 2 Screed minimum 65mm
- 3 Aquafloor heating pipe
- 4 Heating pipe rail
- 5 Foil faced insulation min 25mm
- 6 Solid sub-floor

Unsurpassed in logistics and project planning. Assured quality installations for the mechanical and electric sector.
