Sapphire Mechanical and Electrical Services UK LTD

Project

Neg Earth
Acton
London

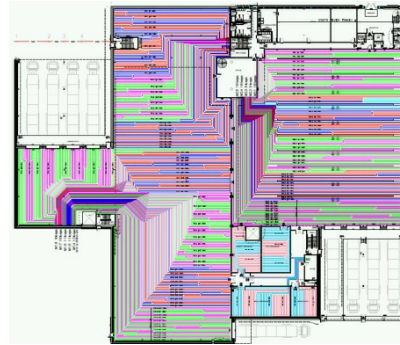

Project Brief

In consultation with Sapphire mechanical UK, Thermotec were asked to provide a complete design and installation scheme, in compliance with the latest environmental and technological heating systems.

Scope of Works

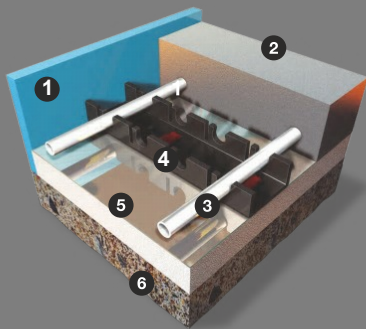

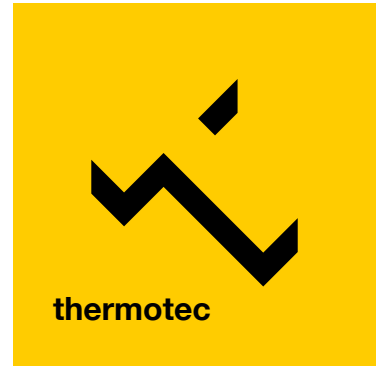

Thermotec delivered a fully integrated floor build up system from the sub-floor base to the final floor screed using our TPA11 Aqua floor underfloor heating system and insulation and standard dial thermostats. The project was managed, installed and supervised by Thermotec, and was delivered on time and within budget.

Project Details

Information taken from the Neg Earth website as follows: in the early hours of Thursday 2nd April 2015 a fire caused extensive damage to our warehouse and offices and, as a result, the building had to be demolished. Fortunately, no one was hurt and, although devastating, in true Neg Earth Lights fashion, we didn't miss a beat and remained fully functional, quickly securing temporary premises and re-stocking the equipment we lost meanwhile, at the original Light House site, construction of our new building is firmly underway.

4000 m²

Aquafloor Installation

- 1 Expansion edging strip
- 2 Screed minimum 65mm
- 3 Aquafloor heating pipe
- 4 Heating pipe rail
- 5 Foil faced insulation min 25mm
- 6 Solid sub-floor

Unsurpassed in logistics and project planning. Assured quality installations for the mechanical and electric sector.
